

AD305s Flashing School Zone Signs

A.D. Engineering's highly visible and innovative Flashing School Zone Signs creates instant awareness of school zones and crossings. The Fixed Speed School Zone Sign displays a single speed with white LED's and a flashing annulus of red LED's.

The Variable Speed School Zone Sign uses white LED's to displays speeds from 20 to 100 in 10 unit increments and a flashing annulus of red LED's. Low maintenance, ultra-reliability and easy installation make the School Zone Signs the ideal choice for schools, mine sites, residential areas or other high-risk areas.

The LED displays are time activated at pre-programmed times by the internal clock and calendar. The School Zone Signs are supplied with calendar scheduling software to allow you to set your own times and dates for operation.

Features

- Date & Time Controlled Operation
- Super-Bright LED Displays
- Automatic Night / Low Ambient Light Dimming
- Robust Vandal Resistant & Weather-Proof Design
- Low Installation & Maintenance Costs
- Long Service Life (>10 Years)
- Conforms to AS/NZS 1906.1 & AS 1743-2001
- Synchronised Flashing for Pairs of Signs via RF Link

Options

- Solar or Mains Powered
- Internal Data Logger (for Traffic Analysis)
- 3G/GSM Remote Schedule Programming
- GPS time synchronisation
