## AD304 LED Flashing Arrow Signs - Type A

A.D. Engineering International's LED Flashing Arrow Signs provide motorists with a clear and early indication of lane changes ahead.

The ultra-bright LED lamps are easily seen in bright daylight and are automatically dimmed for low-light conditions, ensuring optimum visibility at all times. The display can be mounted on top or at the back of any vehicle. Powered by the vehicle's electrics, our cab mounted LED Flashing Arrow Sign is a reliable work-horse for on-site traffic management requirements.

The Type-A LED Flashing Arrow Sign that we produce has a robust weatherproof and vandal resistance design, low maintenance requirements with a long service life. It is ideal for Australia's harsh environmental conditions.

### Features
