

NEW SIGNS INSTALLED FOR THE CITY OF WANNEROO!

We are very pleased to have installed our AD322 Radar Speed Display Signs (RSD) in Alexander Heights, WA Perth.

We were awarded this contract to install 4 x RSD units, these signs are now protecting motorists on Errina Road and Koondoola Avenue. A great initiative for the safety of our communities.

These signs improve safety for all road users. The signs can display the drivers speed, Well Done or a smiley face when the vehicle is doing the correct speed. If the approaching vehicle is going faster than the speed limit a frown or Too Fast will be displayed.

It's great to see local governments working to install these lifesaving signs.

This is proven to remind motorists that may not immediately be aware of their speed and result, in safer environment.

- Speeders will slow down up to 80% of the time when alerted by a radar sign
- Typical speed reductions are 10-20%.
- Result in fewer accidents
- Solar powered
- Creates driver and general public awareness
- Protects drivers and pedestrians
- 100% Australian designed & made

MAKE THE ROADS SAFER- AD Engineering International will make it happen!
